

One public meetin on this critical topic is not enough. In the name of democracy, postpone the vote until there is time for both sides to present their view to the people. Also- no body argues over the amount of programs. It's whether important dissenting views on news can be heard and that is not the case with corporate ownership. It is bad now. It will be much worse with deregulation. If you want our country to survive as a democracy, and if you can put aside the need to make money as the only good that exists you may realize what is at stake here. I beg you to think of important values- and then you will realize that the vote must be put off. Thank you. FRances Alboum
